Subject: Microsoft Settlement

As a Systems Administrator of 4 years on Unix, Windows, Linux, and BSD systems, I wish to comment on the proposed final judgement in United States vs. Microsoft.

It is my opinion that this proposed settlement fails to address some of the most important wrongdoing that Microsoft has committed, fails to prevent Microsoft from engaging in these behaviors in the future, and fails to punish Microsoft for the severe and irreparable damage they have caused to the computer software and hardware industries, as well as the economy of these industries.

Please dispose of this current settlement in its entirety, as it fails to fulfill even the basic criteria of a fair and just settlement. Please consider a settlement that will appropriately give every opportunity to Microsoft's competitors (who currently can not compete) to develop products that benefit the industry and its consumers, rather than Microsoft.

Thank You
